Dear FCC:

WJCF radio station 88.1 has requested in RM 11113 RM 11114 for a change in frequency which would eliminate interference from the station bleeding through channel 6 TV station.

I am one of the residents who's TV is affected by the WJCF bleeding through channel 6. As I do not have cable or a dish system, my TV selections are limited to the basic TV stations (6,8,13,23,59, and 20). WJCF has provided a filter for the TV; however, this does not completely eliminate the problem.

I also have been listening to WJCF since it began broadcasting 5 years ago. Since it is a Christian radio station, I feel that I am daily blessed and strengthened through my daily journey. Their programming is family friendly, I don't need to worry about what my children hear when listening.

I strongly encourage you to grant the change of frequency that WJCF has requested in RM11113 RM11114 without delay or hesitation.

Sincerely,

*Julie A. McGinnis*
